1 WP1 Model
connectome → spiking circuit
M1–36 · H1
T1.1 electrical synapses
T1.2 Tier 1: biophysical
T1.3 Tier 2: reduced
T1.4 Tier 3: trainable
T1.5 muscles, efference copy
D1.1 synapse atlas (M18)
D1.2 reduced model (M24)
2 WP2 Test
what is the third muscle for?
M6–48 · H2, H2b
T2.1 male and female models
T2.2 two stimuli, closed loop
T2.3 tethered experiments
T2.4 free flight (high risk)
T2.5 origin of the muscle
D2.1 stimuli, software (M24)
3 WP3 Explain
why a third muscle?
M12–54 · H3
T3.1 embodied simulator
T3.2 pursuit vs stabilisation
T3.3 ablation and theory
D3.2 motif catalogue (M48)
4 WP4 Transfer
active event-based vision
M13–60 · H4
T4.1 active camera head
T4.2 neuromorphic chips
T4.3 benchmarks, quadrotor
T4.4 closed loop for machines
D4.3 benchmark, data (M54)
labels
task statistics
models on robots
5 WP5 Validate at scale
teaching and open science
M1–60
T5.1 IU courses · T5.2 robot zoo · T5.3 community proofreading · T5.4 hoverfly watch · T5.5 open releases
